Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Model	
librehatti.catalog.models.Attributes	5
librehatti.catalog.models.Catalog	5
librehatti.catalog.models.Category	6
librehatti.catalog.models.ModeOfPayment	7
librehatti.catalog.models.Product	7
librehatti.catalog.models.PurchasedItem	8
librehatti.catalog.models.PurchaseOrder	9
librehatti.catalog.models.Surcharge	11
ModelAdmin	
librehatti.catalog.admin.ProductAdmin	8
librehatti.catalog.admin.PurchaseOrderAdmin	10
StackedInline	
librehatti.catalog.admin.PurchasedItemInline	9
TabularInline	
librehatti.catalog.admin.CatalogInline	6
TestCase	
librehatti.catalog.tests.SimpleTest	10

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

librehatti.catalog.models.Attributes	5
librehatti.catalog.models.Catalog	5
librehatti.catalog.admin.CatalogInline	6
librehatti.catalog.models.Category	6
librehatti.catalog.models.ModeOfPayment	7
librehatti.catalog.models.Product	7
librehatti.catalog.admin.ProductAdmin	8
librehatti.catalog.models.PurchasedItem	8
librehatti.catalog.admin.PurchasedItemInline	9
librehatti.catalog.models.PurchaseOrder	9
librehatti.catalog.admin.PurchaseOrderAdmin	10
librehatti.catalog.tests.SimpleTest	10
librehatti.catalog.models.Surcharge	11

Chapter 3

Class Documentation

3.1 librehatti.catalog.models.Attributes Class Reference

Inheritance diagram for librehatti.catalog.models.Attributes:

Public Member Functions

- `def __unicode__`

Static Public Attributes

- tuple **name** = `models.CharField(max_length=200)`
- tuple **is_number** = `models.BooleanField(default = True)`
- tuple **is_string** = `models.BooleanField(default = False)`

The documentation for this class was generated from the following file:

- `models.py`

3.2 librehatti.catalog.models.Catalog Class Reference

Inheritance diagram for librehatti.catalog.models.Catalog:

Public Member Functions

- def `__unicode__`

Static Public Attributes

- tuple **attribute** = models.ForeignKey([Attributes](#))
- tuple **value** = models.CharField(max_length=200)
- tuple **product** = models.ForeignKey([Product](#))

The documentation for this class was generated from the following file:

- models.py

3.3 librehatti.catalog.admin.CatalogInline Class Reference

Inheritance diagram for librehatti.catalog.admin.CatalogInline:

Static Public Attributes

- **model** = [Catalog](#)
- list **fields** = ['attribute', 'value']
- int **extra** = 10

The documentation for this class was generated from the following file:

- admin.py

3.4 librehatti.catalog.models.Category Class Reference

Inheritance diagram for librehatti.catalog.models.Category:

Public Member Functions

- def `__unicode__`

Static Public Attributes

- tuple **name** = models.CharField(max_length=100)
- tuple **parent** = models.ForeignKey('self', blank=True, null=True)

The documentation for this class was generated from the following file:

- models.py

3.5 librehatti.catalog.models.ModeOfPayment Class Reference

Inheritance diagram for librehatti.catalog.models.ModeOfPayment:

Public Member Functions

- def `__unicode__`

Static Public Attributes

- tuple **method** = models.CharField(max_length=25)

The documentation for this class was generated from the following file:

- models.py

3.6 librehatti.catalog.models.Product Class Reference

Inheritance diagram for librehatti.catalog.models.Product:

Public Member Functions

- def `__unicode__`

Static Public Attributes

- tuple **name** = models.CharField(max_length=100)
- tuple **category** = models.ForeignKey([Category](#))

- tuple **price_per_unit** = models.IntegerField()
- tuple **organisation** = models.ForeignKey('useraccounts.AdminOrganisations')

The documentation for this class was generated from the following file:

- models.py

3.7 librehatti.catalog.admin.ProductAdmin Class Reference

Inheritance diagram for librehatti.catalog.admin.ProductAdmin:

Static Public Attributes

- list **fields** = ['name', 'category', 'price_per_unit', 'organisation']
- list **inlines** = [[CatalogInline](#)]

The documentation for this class was generated from the following file:

- admin.py

3.8 librehatti.catalog.models.PurchasedItem Class Reference

Inheritance diagram for librehatti.catalog.models.PurchasedItem:

Public Member Functions

- def **save**
- def **__unicode__**

Public Attributes

- **price**

Static Public Attributes

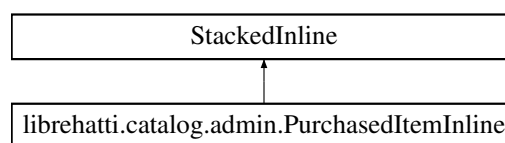

- tuple **purchase_order** = models.ForeignKey([PurchaseOrder](#))
- tuple **price** = models.IntegerField()
- tuple **qty** = models.IntegerField()
- tuple **item** = models.ForeignKey([Product](#))

The documentation for this class was generated from the following file:

- models.py

3.9 librehatti.catalog.admin.PurchasedItemInline Class Reference

Inheritance diagram for librehatti.catalog.admin.PurchasedItemInline:

Static Public Attributes

- **model** = [PurchasedItem](#)
- list **fields** = ['item', 'qty',]
- int **extra** = 10

The documentation for this class was generated from the following file:

- admin.py

3.10 librehatti.catalog.models.PurchaseOrder Class Reference

Inheritance diagram for librehatti.catalog.models.PurchaseOrder:

Public Member Functions

- def **__unicode__**

Static Public Attributes

- tuple **buyer_id** = models.ForeignKey([User](#))
- tuple **is_debit** = models.BooleanField(default = False)
- tuple **delivery_address** = models.ForeignKey('useraccounts.Address')

- tuple **organisation** = models.ForeignKey('useraccounts.AdminOrganisations')
- tuple **date_time** = models.DateTimeField(auto_now_add=True)
- tuple **total_discount** = models.IntegerField()
- tuple **tds** = models.IntegerField()
- tuple **mode_of_payment** = models.ForeignKey([ModeOfPayment](#))

The documentation for this class was generated from the following file:

- models.py

3.11 librehatti.catalog.admin.PurchaseOrderAdmin Class Reference

Inheritance diagram for librehatti.catalog.admin.PurchaseOrderAdmin:

Public Member Functions

- def **response_add**

Static Public Attributes

- tuple **exclude** = ('is_suspense',)
- list **inlines** = [[PurchasedItemInline](#)]
- **model** = [PurchaseOrder](#)

The documentation for this class was generated from the following file:

- admin.py

3.12 librehatti.catalog.tests.SimpleTest Class Reference

Inheritance diagram for librehatti.catalog.tests.SimpleTest:

Public Member Functions

- def **test_basic_addition**

The documentation for this class was generated from the following file:

- tests.py

3.13 librehatti.catalog.models.Surcharge Class Reference

Inheritance diagram for librehatti.catalog.models.Surcharge:

Public Member Functions

- def `__unicode__`

Static Public Attributes

- tuple **taxes** = models.CharField(max_length=200)
- tuple **value** = models.IntegerField()
- tuple **taxes_included** = models.BooleanField(default = False)
- tuple **tax_effected_from** = models.DateField()
- tuple **tax_valid_till** = models.DateField()
- tuple **Remark** = models.CharField(max_length=1000)

The documentation for this class was generated from the following file:

- models.py
